# ADL Hate Crime Map

Below is an interactive map of America that shows selected hate crimes reporting data from the FBI from 2004-2015. Unfortunately, for a variety of reasons, dozens of large cities either do not report hate crime data at all – or underreport the data to the FBI.

ADL is working with communities across the country to improve their hate crime reporting.

Hate Crime Laws	Hate Crime Data

State	California ⌄
City	All ⌄
Year	2015 ⌄
Protected category	All ⌄
Totals by	City ⌄

Reset
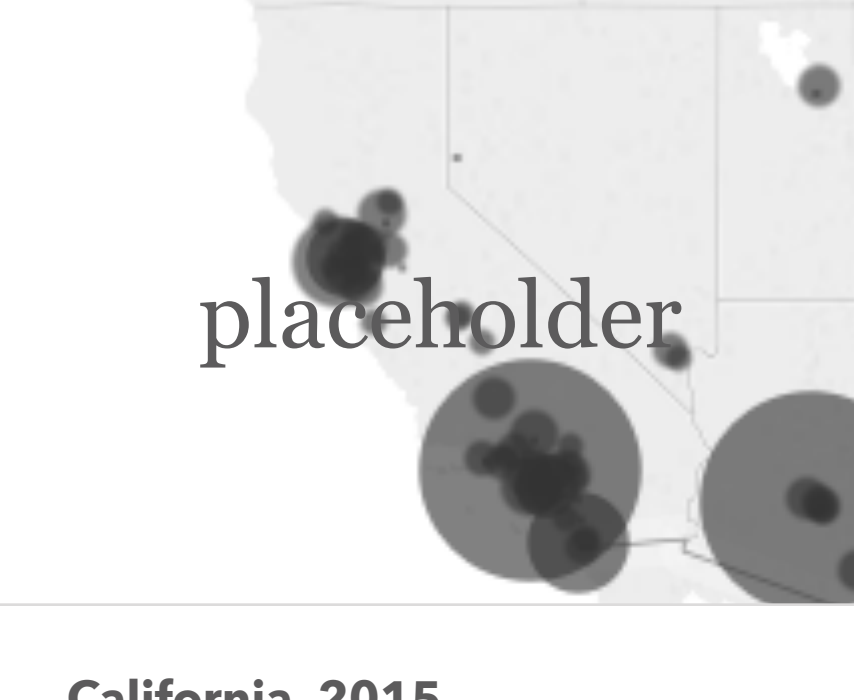

California, 2015

Total hate crimes: 785

		Group protected by state laws
Race/Ethnicity	1,053	✓
Religion	1,234	✓
Anti Jewish	664	✓
Anti Muslim	257	✓
Sexual Orientation	3,310	✓
Disability	74	✗
Gender	23	✗
Gender Identity	114	✗

Police participation in the HCSA, like all other FBA crime data, is voluntary. Studies show that knowing the nature and magnitude of the hate crime problem is fundamental for resource allocation and crime deterrence. More important, targeted communities are much more likely to report crime and cooperate in investigations if they believe law enforcement authorities are ready and able to respond to hate violence.

Notes:
Hate crime data at the national level uses a broader data set than hate crime data at the state level, therefore a sum of hate crimes at the state level will not add up to the total hate crimes at the national level.

Hate crime data at the state level uses a broader data set than hate crime data at the city level. Therefore, a sum of hate crimes at the city level will not add up to the total hate crimes at the state level. Hate crimes based on race and ethnicity were merged into one category (i.e. Race/Ethnicity) as of 2015 and appear on the map accordingly.

Religion-based hate crimes against Jews and Muslims are highlighted. Other types of religion-motivated hate crimes are not included.
